INTRODUCING CALLBACK ASSIST FOR AVAYA IP OFFICE CONTACT CENTER

AVAYA DEVCONNECT TECHNOLOGY PARTNER

A brilliant addition to upgrade your contact center, Imperium's Callback Assist is a versatile tool that restores missed customer-service opportunities.

A contact center is bound to have abandoned calls but that needn't limit your capability to assist every customer who reaches out to your enterprise. The Callback Assist module is designed to regularly monitor dropped calls and collate a list of genuine customers. The system then automatically calls back and connects these customers with the available agents. The Callback Assist also offers customer the option for receiving callbacks based on their position in the queue. It's a powerful, fully functional way to execute the thought that every caller matters.

THE CALLBACK ASSIST IS IDEAL FOR:

- Automation of Work-flow.
- Efficiency in Time and Call Management.
- Channelizing and segregating calls based on urgency and availability.
- Satisfactory customer experience and resolution rate.
- Recovering lost business and goodwill opportunity.
- Leveling call traffic by shifting peak call volumes to non-peak times.

IMPERIUM SOFTWARE TECHNOLOGIES

We are an industry leader for ICT solutions and the only regional expert in to hold almost a decade long association with Avaya as a **certified Avaya DevConnect Technology partner.** Our expertise and finesse in holistic end-to-end solutions endows us the status of a fully-charged **software product house** that develops value added products on top of Avaya system. **Seamless Integration** of varied business applications with Avaya is our inbuilt speciality. RECENT SUCCESS STORY

Imperium Software Technologies recently installed a contact center for Emirates Hospital group in Dubai, UAE. A renowned healthcare center that benefited from a Callback Assist system offered by us. The module integrated with their contact center helped the team to deliver up to the hospital's value of undivided care and concern for all.

We have helped many companies in the gulf region and across the globe with our business productive applications.
