Your CRM is Capable, Bridge Its Efficiency To The Next level!

Get the IMPERIUM CRM CONNECT
Imperium Software Technologies

Our Best Offer For You

The CRM Connect is Imperium's topnotch unified desktop CTI application that leverages the CRM system to effectuate a circle of productivity between the call center, customers and the CRM business insight. Imperium CRM Connect not only forms a link between CRM database and Telephony system, but instills functionality such as automatic call logging, updating customer information, directory integration, click to call, and a lot of desktop notification and missed calls views. Hence becoming the single point of access to all the mission-critical applications and media control tools required by the agents to effectively complete a customer interaction.

Imperium Software Technologies

We are the leaders of ICT solutions and the only industry expert in the region to hold 12 years of association with Avaya as a certified Avaya DevConnect Technology partner.
