HOW?

On premise

On Cloud

Hybrid

The Foundation of ICT at any Business Centre

Unified Communication

Unified Communication is a advanced technology for an organization to be on the same page for work to make work progress flawlessly from varied ends. Unified Communication is a platform for amplified corporate communication from multiple message, voice and video platforms, and from anywhere and anytime. It renders your company Omni presence and superior connectivity with customers.

Telephony

A PABX system for automation of business telecommunication through electronic transmission of voice between distant parties using telephone.

Contact Center

A multi-channel contact center to meet the needs of a flourishing business. A contact center is laid with functionalities such as call routing, call recording, service on your call.

A Layer of Imperium Products

CTI Solutions - Integrate your CRM and Business applications with telephony to leverage the best of both.

Call Management System - Trace your telephony with insightful custom reports, billing, that give you broad business insight

Customer Survey Module - Know what your customer think of you to tragically enhance customer service experience

Callback Assist Module – Allow customers to schedule call backs and even better automate outbound calls to abandoned calls

Toll Fraud Protection – Guard your business telephony from toll fraud and hacking attempts with immediate notifications and call blocking.

Budget Control Feature - Plan your finances for telephony with better control, coordination and performance evaluation

Push and Pull (SMS) Notification System – Reach your customers wherever they are through instant notifications.

Islamic Prayer Announcement Solution – It will record and play prayers on your telephone system at the right time.

Payroll / HRMS - Simplify Human resource handing in corporates with an efficient and reliable system.

Web RTC Technology Applications - Make your brand accessible through interactive Click to Call solutions, Mobile applications and more.
