OMNIYAT REAL ESTATE

BUILDS RICH CUSTOMER EXPERIENCES USING CRM INTEGRATION WITH SALESFORCE FOR AVAYA IPOCC

A Case Study on
CRM Connect & Quality Monitoring Module

OMNIYAT®

A distinguished name in the real estate sector bent on building outstanding landmark on Dubai's skyline, **Omniyat** is a property design and development firm that create startling environments in residential, commercial, hospitality and retails spaces in UAE.

An organization of such prominent stature requires a state-of-the-art business communication center to support high-end correspondence with their patrons and clients.

CUSTOMER CONCERN

Customer service is something that sets you apart in real estate. The routinely activity of a commercial and residential real estate agent requires strong communication utility and system to rapidly address customer queries and deliver customer satisfaction. Lag in response time would mean losing business or worst handing it over to competitors. Omniyat is not vary to this and they are in need of a telecommunication system that could adapt to their business competency and represent the top-notch business well. Building a contact center had been a good decision in past, but a robust and technologically advanced one could just do the trick. The answer was **Avaya IP Office Contact Center** with unmatched intelligence.

WHY IMPERIUM?

When it comes to industry specific solutions in ICT and business automation software, we stand as an unmatched leader. Imperium adapts to latest technology in the industry and holds in-depth knowledge of core communication products. At the foremost, we internalize the client's concerns and address them in a short span of time with tailor-made solutions. Imperium clientele speaks about the trust we have developed with our clients who choose us as their ICT solution partner.

AVAYA CONTACT CENTER

AVAYA
The Power of We™

In 2017, Omniyat got its contact center with a handful of agents to support their business communication center. The Avaya IP Office Contact Center was implemented on premise with the best of capabilities and Imperium products to compliment on top.

1 IMPERIUM IMPLEMENTED AVAYA IPOCC SUITE WITH UNIFIED COMMUNICATION

A multichannel platform for customer care agents to engage with customers on varies platform through voice, video, instant chat, conference. Avaya IPOCC provides agents with tools to reach out to clients with new opportunities and to be ready for delivering impeccable customer service to the callers at the contact center. Keep track of the progression of customer experience and deploy assistance from seniors or technical support at any instant for customer service.

Skill-based call routing through IVR that take the incoming calls through a streamlining process, putting the callers in cue and routing it to the agent best skilled to handle the particular query. The IVR also offers self-help and customer prioritization enabled by call-back option offered to them.

At Ominyat where every customer query requires careful handling and clear communication, the presence of a supervisor at contact center is essentials in serving quality and meet customer expectations. The Avaya IPOCC has been instrumental in this case offering a supervisor access role with privileges to overlook the entire workflow, conduct audits and assessments for quality management and work force productivity.

Communication and availability plays a crucial part of a customer journey in real estate. With Engineers visiting site away from office, Omniyat would benefit with Avaya's Remote worker set up which enables multi-site operations and optimal resource allocation, regardless of location using the latest technologies including WebRTC.

2

CRM CONNECT FOR SALESFORCE CRM

Avaya CRM Connect facilitated a bridge between the in-house Salesforce CRM and the newly setup Avaya IP Office contact Center at Omniyat. Imperium is an integration partner of Salesforce and we offer implemented the CRM Connect not just internally but to reflect as an Interal Avaya Dialer with Salesforce portal with full access to Avaya contact center capabilities from a single screen.

3

IMPERIUM QUALITY MONITORING MODULE

As part of our custom solution efforts for our clients, we offered an additional feature for the contact center at Omniyat in term of Imperium Quality Monitoring Module.

The Imperium Call recorder records and archives customer's call conversations in the Salesforce CRM and allows customer service agents to instantly fetch these recordings on their screen for reference whilst on customer call. This feature empowers the agents to monitor the case specific details of an escalated situation with absolute calmness and problem-solving attitude.

The Quality Monitoring Module brought the much sought quality control fellowed by self-assessment and assurance to Omniyat contact center.

CUSTOMER SATISFACTION

Omniyat Contact center has been a phenomenal success with the Salesforce CRM. The finesse and the ease of implementation of Avaya solutions for optimal results is the forte of Imperium and makes us standout in the GCC region. Omniyat team seems quite satisfied by deploying an ICT partner who understands and exceeds expectations. We already foresee a long business correspondence with Omniyat as an ICT solutions provider. Yet another happy client to the credit of **Imperium Software Technologies.**
